

Docs- Workflow [link](#) to the website

1. Tenant Background Check

- Enter an authentication token in the main form
- System retrieves tenant data from X-cite API
- Results display personal information for tenant, property, and landlord

2. Data Submission to KautionFrei

- Click **"Insert to KautionFrei"** button in the X-cite panel
- System maps X-cite data to KautionFrei format
- Data is submitted to KautionFrei API
- Upon success, a Contract ID is immediately displayed

3. Automatic Status Check

- After successful submission, **a 5-second** countdown timer appears
- Progress bar shows time remaining before status check
- System automatically checks application status after countdown completes
- Status results (accepted/pending/rejected) appear with details

4. Manual Status

- Check (Optional) "Check Status Again" button allows manual status verification
